Application for Regional Field CTO at Black Duck

Dear Hiring Manager,

I am applying for the Regional Field CTO role at Black Duck, where I can utilize my technical expertise to drive application security solutions. The company's focus on SAST, SCA, and DAST, as well as its work with AI/ML, Cloud/SaaS platforms, and APIs, aligns with my interests and skills. Black Duck's reputation as an equal opportunity employer and its commitment to compliance with all applicable laws also resonate with me.

Black Duck's application security solutions, including its work with AI/ML, are impressive, and I am drawn to the company's expertise in this area. The fact that Black Duck works with Cloud/SaaS platforms, APIs, and integrations also suggests a deep understanding of the complexities of modern application security. As someone who has designed autonomous systems with 90% accuracy and utilized Python, ReactJS, and Computer Vision, I believe I can contribute to the company's mission.

I am seeking a technical leadership role in application security with AI/ML, and I believe my experience and skills make me a strong fit for this position. Having worked effectively in remote settings, utilizing async communication and written-first culture, I am confident in my ability to collaborate with global teams. I am available to start immediately, and I look forward to discussing how my skills can support Black Duck's continued growth and success in the EMEA region, bringing my expertise in REST API, Hedera DLT, and Smart Contracts to the table.

Sincerely,

Chedy Chaaben
