Application for Junior Performance Marketer at EverAI

Dear Hiring Manager,

I am applying for the Junior Performance Marketer role at EverAI, a company that builds an AI companionship platform and works with industry leaders like ChatGPT and Hugging Face. The company's focus on radical creativity and velocity in the AI industry aligns with my own approach to designing solutions that replace manual work with reliable, orchestrated, and secure automated systems.

EverAI's work in AI companionship, particularly with platforms like Cursor and Claude Code, demonstrates a commitment to innovation and problem-solving that I find compelling. My experience as an AI Engineer Intern, where I architected an orchestrated multi-agent system and industrialised the pipeline as a REST API, has given me a strong foundation in designing and implementing effective solutions. I am drawn to the idea of applying my skills in performance marketing and user acquisition to help EverAI continue to push the boundaries of what is possible in the AI industry.

As a software engineer based in Tunisia, I am comfortable working in a distributed team and am well-suited to the async work style of a remote role. I am excited about the prospect of working with a team based in Germany and am open to visiting or relocating later if the role evolves. With my recent graduation and experience in designing automated systems, I am ready to start my career and am looking for a company like EverAI that can provide me with the right environment to grow and learn. I am asking to join the EverAI team as a Junior Performance Marketer, where I can apply my skills and experience to contribute to the company's continued success.

Sincerely,

Chedy Chaaben
