Application for (Senior) Software Engineer - Data Integration Focus at praxipal

Dear Hiring Manager,

I am applying for the role of (Senior) Software Engineer - Data Integration Focus at praxipal, where I can utilize my skills in software engineering and data integration to contribute to the development of AI-powered healthcare admin workforce, including the AI receptionist called Luna. This role aligns with my interests and experience in designing autonomous information systems and integrating artificial intelligence to solve complex problems.

Praxipal's work in building an AI-powered healthcare admin workforce, including an AI receptionist called Luna, is what drew me to this company, as it highlights their focus on innovative solutions in the healthcare industry, which is an area I am interested in exploring further. The fact that they work with AI and healthcare software also aligns with my skills and experience, particularly in designing and developing autonomous information systems and integrating computer vision for component segmentation. As someone who is used to working remotely, I appreciate praxipal's fast-paced and remote work environment, which allows for async communication and a written-first culture, and I believe my experience working remotely in Tunisia will enable me to effectively collaborate with the team.

As a software engineer with experience in designing autonomous information systems and integrating artificial intelligence, I am confident that I can bring value to praxipal's data integration efforts, particularly with AI applications. My experience in developing and normalizing large datasets, automating detection of visual anomalies, and creating REST APIs for pluggable QA workflows has prepared me for the challenges of this role. I am now seeking a data integration role where I can apply my skills and experience to contribute to the development of innovative solutions, and I believe that praxipal's (Senior) Software Engineer - Data Integration Focus role is a good fit for my skills and interests, and I am available to start working remotely from Tunisia.

Sincerely,

Chedy Chaaben
