Application for Staff Product Manager [Machine Learning expertise] at Qonto

Dear Hiring Manager,

I am applying for the Staff Product Manager [Machine Learning expertise] role at Qonto, a company that has developed Europe's leading finance workspace with banking at its core, augmented by financial tools. This role aligns with my interest in product management and machine learning, particularly in the finance sector. Qonto's focus on customer satisfaction, diversity, and merit-based hiring also resonates with my values.

Qonto's work with AI and machine learning to enhance their finance workspace is what drew me to this company. Their emphasis on experimentation and ownership suggests a culture that values innovation and continuous improvement. I am impressed by the fact that Qonto's platform is designed to serve SMEs, providing them with a comprehensive finance workspace. This focus on serving a specific segment of the market suggests a deep understanding of their needs and a commitment to delivering tailored solutions.

As a recent graduate with experience in designing autonomous systems with computer vision and machine learning, I am seeking a product management role in finance that utilizes my technical skills and allows me to relocate to Paris. My experience as an AI Engineer Intern at KPIT Technologies, where I designed an autonomous information system and developed a REST API, has given me a strong foundation in machine learning and software development. I am now looking for a role that will allow me to apply my skills in a finance context and continue to grow as a professional, which is why I am applying for this position at Qonto.

Sincerely,

Chedy Chaaben
