Application for Data Scientist / Data Engineer at 80 Beats Medical GmbH

Dear Hiring Manager,

I am applying for the Data Scientist / Data Engineer role at 80 Beats Medical GmbH, a company that focuses on Medical Technology, specifically Cardiovascular Diagnostics, using AI and Machine Learning. The company's work in building secure, compliant cloud-based data ecosystems for medical technology is of particular interest to me. 80 Beats Medical GmbH is based in Berlin, and I am available to relocate for the onsite position.

The company's emphasis on using Data Scientist and Data Engineer expertise to improve Cardiovascular Diagnostics is what drew me to this role. I am interested in the way 80 Beats Medical GmbH uses AI and Machine Learning to drive innovation in medical technology. My experience in designing solutions that replace manual work with reliable, orchestrated, and secure automated systems, and my ability to bring in artificial intelligence as an accelerator, make me a suitable candidate for this position.

As a software engineer with experience in data engineering, AI, and machine learning, I believe I can make a valuable contribution to 80 Beats Medical GmbH. My previous work, such as architecting autonomous information systems and designing NLP solutions, has required me to think critically and develop creative solutions to complex problems. I am looking to bring my skills and experience to a new challenge, and I believe this role at 80 Beats Medical GmbH would be a good fit. I have attached my CV, which provides more details about my experience and qualifications.

Sincerely,

Chedy Chaaben
