EFREI Paris

8 October 2026

Application for Mastère Spécialisé Data and Generative AI Engineering at EFREI Paris

Dear Hiring Manager,

I am applying for the Mastère Spécialisé Data and Generative AI Engineering at EFREI Paris, a program that aligns with my interests in data and artificial intelligence engineering. The fact that EFREI Paris offers training programs in these areas is a key factor in my application, as I believe it will provide me with the necessary skills to grow as a software engineer. I am drawn to the program's focus on Data Engineering, IA générative, Cloud Computing, and Machine Learning Engineering, which are all areas I have experience in and want to explore further.

The work involved in data and artificial intelligence engineering is what motivates me to apply for this program. My experience as an Odoo & AI Developer Intern at Fogits, where I designed and developed Odoo 19 modules for intelligent stock, purchasing, and sales management, has shown me the potential of combining backend development, automation, and AI to solve business problems. Similarly, my work as a Full-Stack Blockchain Developer Intern at Altavo Partners, where I developed a decentralized commerce platform, has given me a deeper understanding of the importance of automation and AI in streamlining business workflows. These experiences have taught me the value of integrating different technologies to create practical software solutions.

I am now looking for an opportunity to contribute to real products, take on technical challenges, and continue growing through hands-on development. The Mastère Spécialisé Data and Generative AI Engineering at EFREI Paris is the next step in my career, and I am asking to be considered for a place in this program. I believe that my experience and skills make me a suitable candidate, and I am looking forward to the opportunity to learn and grow with EFREI Paris. I am asking for a place on this program to start my journey in data and generative AI engineering.

Sincerely,

Mohamed ELLOUMI
